Contents

1	Autonomous robots	1
1.1	Robotic hardware	2
1.1.1	Sensors	2
1.1.2	Actuators	7
1.1.3	Microcontrollers	11
1.1.4	Human-robot interaction	12
1.2	Kinematics	13
1.2.1	The differential drive	13
1.3	Dynamics	14
1.4	Localization	18
1.4.1	Dead reckoning	18
1.5	Simulation of autonomous robots	19
1.5.1	General issues	20
1.5.2	Components of ARSim	23
1.5.3	Using ARSim	26
2	Animal behavior	29
2.1	Introduction and motivation	29
2.2	Bottom-up approaches vs. black-box approaches	29
2.3	Nervous systems of animals	30
2.4	Ethology	31
2.4.1	Reflexes	31
2.4.2	Kineses and taxes	32
2.4.3	Fixed action patterns	34
2.4.4	Animal motivation	35
2.5	Other topics	38
3	Behavior-based robotics	39
3.1	Approaches to machine intelligence	39
3.2	Behavior-based robotics	40

3.2.1	Comparison with classical AI	40
3.2.2	Behaviors and actions	42
3.2.3	Intelligent behavior and reasoning	42
3.2.4	Features of behavior-based robots	42
3.3	Generating behaviors	43
3.3.1	Behavioral architectures	44
3.3.2	Braitenberg vehicles	45
3.3.3	Hand-coded behaviors	46
4	Evolutionary robotics	53
4.1	Introduction and motivation	53
4.1.1	A simple example	55
4.1.2	Cleaning behavior in a Khepera robot	57
4.2	Issues in evolutionary robotics	58
4.2.1	Selecting a representation	58
4.2.2	Fitness measures	59
4.2.3	Simulations vs. evolution in actual robots	60
4.3	Evolving single behaviors	62
4.3.1	Navigation	63
4.3.2	Box-pushing	67
4.3.3	Behaviors for robot soccer	69
4.3.4	Motion of a robotic arm	70
4.4	Evolving behaviors with ERSim	71
4.4.1	A simple example	71
5	Utility and rational decision-making	75
5.1	Utility	76
5.2	Rational decision-making	79
5.2.1	Decision-making in animals	80
5.2.2	Decision-making in robots	84
6	Behavioral organization	85
6.1	Introduction and motivation	85
6.2	Complex behaviors without explicit arbitration	85
6.3	Methods for behavioral organization	88
6.3.1	Taxonomy of methods for behavioral organization	88
6.3.2	The utility function method	89
6.3.3	The potential field method	103
6.3.4	Other methods	107
Appendix A: Matlab functions in ARSim		109
Appendix B: Matlab functions in ERSim		115
